Region: Yirgacheffe

Altitude: 1700 - 2200 m

Variety: Arabica Blend

Process: Washed

Profile: Floral, orange, milk chocolate, red berries.

Score: 85

ETHIOPIA

The Yirgacheffe region, located in southern Ethiopia, is renowned for its high-quality coffee plantations. Situated at altitudes between 1,700 and 2,200 meters, the climate and soil conditions are ideal for growing Arabica coffee. The mild climate and high altitude are ideal for developing beans with unique and complex flavors. Yirgacheffe coffee is known for its delicate floral aroma and smooth, balanced acidity. Harvesting is selective, with only ripe beans being picked, resulting in greater uniformity. The washed processing method removes the pulp from the fruits before drying, ensuring a cleaner, crisper flavor.
